

INTRODUCING THERMINOL 62, THE NEWEST MEMBER OF OUR PERFORMANCE TEAM.

Therminol® 62 Heat Transfer Fluid is the perfect fit for systems requiring high temperature, low-pressure performance up to 620 °F (325 °C). With excellent thermal stability and low vapor pressure, you can count on Therminol 62 to deliver reliable, consistent performance for your heat transfer system over long periods of time. In fact, the performance of Therminol heat transfer fluids has been proven for over 40 years of industrial experience under a wide range of operating conditions. Don't take chances. Go with the team that delivers before, during and after the sale with outstanding products and unparalleled service. Go with the Therminol performance team. Learn more about Therminol 62 and our TLC Total Lifecycle Care® program. In North America, call 1-800-426-2463 or in Europe, call 32.10.48.12.11. You'll see no other heat transfer fluids take the heat like Therminol.
